COLLINS KIPKIRUI LAGAT

Software Engineer | AI Enthusiast | CNC Operator

0708889016 | collinslagat1901@gmail.com | Portfolio | GitHub | LinkedIn

PROFESSIONAL SUMMARY

Software engineer, technology enthusiast, and CNC operator with experience developing digital platforms, leading student innovation activities, and producing custom CNC wood art. Passionate about artificial intelligence and machine learning, with a strong interest in learning how AI systems work and exploring the development of increasingly autonomous technologies. Combines software development, technical design, and hands-on project coordination, with an interest in practical technology that improves access, efficiency, and local business opportunities.

TECHNICAL SKILLS

Software & Web: JavaScript (Intermediate), TypeScript, React, Tailwind CSS, Python (Basic), SQL (Intermediate)

Tools: Git, GitHub, Microsoft Excel (Advanced), Vectric Aspire, CNC machine operation, G-code/toolpath workflows

Core Competencies: Software development, product prototyping, technical design, problem-solving, analytical thinking, team leadership, project coordination

PROFESSIONAL EXPERIENCE

Co-Founder | Thee Entity | 2025–Present

- ✓ Built and contributed to multiple digital products aimed at practical business and community needs, including QuickPrint, StockFlow, and Mavuno Insight.
- ✓ Developed QuickPrint, a digital print-job submission workflow that enables customers to send files through a shop-specific QR code or code instead of relying on WhatsApp conversations, helping reduce back-and-forth communication and streamline order intake.
- ✓ Contributed to StockFlow, an AI-powered business inventory and workflow platform designed to help businesses organize stock information and routine operations digitally.
- ✓ Co-developed Mavuno Insight, an agriculture-focused prototype that brings regional and market insights together to help young farmers make more informed decisions about what, where, how, and where to sell. Improving Quality of the produce by 90%.
- ✓ Helped bring Thee Entity's services closer to the community through the launch of Entity Cyber Café, providing a local access point for digital and online services by a simple QR code scan.
- ✓ Presented the Mavuno Insight project to His Excellency Dr. William Samoei Ruto, C.G.H. at a presidential exhibition https://lnkd.in/p/dk4xGFkR https://lnkd.in/p/dk4xGFkR, introducing the platform's agricultural use case to a wider audience.

Tech Hub Lead | Umma Tech Hub, Umma University | 2024–2025

- ✓ Expanded student participation by 50% in the university's technology community during senior year by engaging and bringing together students interested in technology and innovation.
- ✓ Co-organized and hosted the first hackathon held at Umma University, creating a structured opportunity for students to collaborate, network, build ideas, and participate in practical innovation.
- ✓ Led the event "Evolving Tech Careers in the Age of AI and Automation," hackathon, helping students explore changing technology career paths.

Athletics Technical Official | Athletics Events | 2022–Present

- ✓ Advanced from an initial role in refreshments support to the Secretariat at Kipkeino Classic 2026, reflecting increased responsibility within event operations.
- ✓ Supported athlete and technical-official welfare at athletics events by helping coordinate refreshments and ensuring participants and officials had access to drinking water and refreshments.
- ✓ Contributed to event operations at competitions including Nairobi City Run, Kipkeino Classic, and Great Chepsaita Cross Country Run.

CNC Operator & Wood Art Designer | CNC Woodworks | Present

- ✓ Introduces CNC-based wood-art production to customers in Eldoret by designing and producing custom decorative pieces using computer-controlled cutting and carving.
- ✓ Turns digital concepts into physical products by preparing designs and toolpaths in Vectric Aspire, then operating CNC equipment to produce custom wood art for sale.
- ✓ Creates opportunities for personalized wood décor by offering custom designs and finished pieces tailored to customer preferences.

SELECTED PROJECTS

QuickPrint | Digital Printing Workflow Platform

- Developed a print-order intake workflow that lets customers submit files through a shop-specific QR code or code, reducing dependence on manual WhatsApp exchanges and helping print shops receive jobs in a more organized way.

Technologies: React, Vite, Tailwind CSS, Supabase

StockFlow | Inventory & Business Workflow Platform

- Contributed to a digital system intended to help businesses manage inventory information and routine workflows in a more organized, accessible format.

Mavuno Insight | AI-Powered Agriculture Guidance

- Developed a prototype concept that uses regional information, market data, and AI-assisted insights to guide young farmers on what, where, and when to plant, how to grow crops, when to harvest, and where to sell.

Technologies: JavaScript, React, Tailwind CSS, TypeScript, Python

CNC Wood Art | Digital Design-to-Machining Workflow

- Creates custom wood-art designs in Vectric Aspire, converts designs into toolpaths/G-code, and uses CNC machinery to carve or cut designs into wood-based materials.
- Combines digital design and machine operation to turn visual concepts into physical products for sale, bringing
- computer-controlled wood-art production to customers in Eldoret.

EDUCATION & TRAINING

Bachelor of Science in Information Technology | Umma University, Kajiado County
Second Class Lower

DevOps Engineering | DevOps Easy Learning (USA)

St Patrick's High School | Iten
Kenya Certificate of Secondary Education (KCSE): C+

St Matthews Primary School | Septonok
KCPE: 373 marks (B+)

REFEREES

Dr. Yusuf Muchelule
Chairperson, Umma Tech Hub | mucheluley@gmail.com | 0701952124

Kennedy Tanui
Competition Director, Athletics Kenya | kennedytanui@athleticskenya.or.ke | 0725629660
